Warnings

- Ensure device plugs are fully inserted into the outlets to prevent electric shocks.
- Do not use the power strip with wet hands or in wet locations.
- Do not disassemble the power strip yourself. Contact the vendor or a qualified electrician for technical assistance.
- Keep the power strip away from explosive or highly flammable substances.

Safety Guidelines

To ensure safe and proper use of this power strip, please adhere to the following safety guidelines:

1. Electrical Safety

- Always check the voltage and current ratings of the power strip and connected devices before use.
- Avoid overloading the power strip. The total connected load should not exceed 4000W.
- Disconnect the power strip from the wall outlet during thunderstorms or when not in use for extended periods.

2. Placement Safety

- Do not place the power strip on uneven or unstable surfaces to prevent tipping.
- Keep the power strip away from water, moisture, or other liquids to avoid electrical hazards.

3. Fire Prevention

- Do not use the power strip near heat-emitting devices like radiators or stoves.
- Keep flammable materials such as curtains, papers, or chemicals away from the power strip.

4. Child Safety

- Keep the power strip out of children's reach.
- Avoid leaving unused outlets exposed; consider using outlet covers if needed.

5. Cable Management

- Avoid tightly coiling or binding the power cable, as this can cause overheating.
- Regularly inspect the cable for any signs of damage or wear and replace it if necessary.

Troubleshooting

1. When to Reset

If the power strip shuts down due to overloading:

- Disconnect all connected devices.
- Press the overload protector button located at the bottom of the power strip.
- Reconnect devices, ensuring the total load does not exceed 4000W.

2. USB Ports Not Working

Possible Reason ①:

The power strip is not fully plugged into the AC outlet.

- Solution: Reconnect the power strip securely to the outlet.

Possible Reason ②:

The USB ON/OFF switch is turned off.

- Solution: Ensure the USB switch is turned on.

Possible Reason ③:

The total current of connected devices exceeds the USB output limit.

- Solution: Disconnect some devices to reduce the load.

The crossed-out wheeled bin symbol indicates that the item should be disposed of separately from household waste. The item should be handed in for recycling in accordance with local environmental regulations for waste disposal. By separating a marked item from household waste, you will help reduce the volume of waste sent to incinerators or land-fill and minimize any potential negative impact on human health and the environment.
