

# HSM ProfiPack P425

## HSM ProfiPack P425 packaging machine

This robust and performance-optimised packaging machine is used to process a number of layers of cardboard into a padding mat or padded filling material. The professional device is mobile on steering rollers and can be used with total flexibility.

### Technical data

| <b>Throughput capacity:</b> | 80 kg/h              | <b>Width x Depth x Height:</b>       | 770 x 611 x 1040 mm |
| <b>Power consumption:</b>   | 2000 W               | <b>Weight:</b>                       | 165 kg              |
| <b>Voltage / Frequency:</b> | 220-240 V / 50-60 Hz |                                      |                     |
| <b>Intake width:</b>        | 425 mm               |                                      |                     |

### Product information

When the emergency stop switch is actuated, the device stops immediately.

Integrated connection for dust suction.

The high efficiency of the drive enables a particularly sustainable operation of the device.

### High-quality packaging material

The packaging material can be used wherever required and provides an optimum protection for objects.

### Continuous operation

Powerful drive allows continuous operation.

### Working width as required

The infinitely variable adjustment of the working width with a scale allows the production of cushioning material exactly as required.

### Intuitive controls

The intuitive operator control panel with LED indicators on a robust keypad signals the operating status of the device.

### Specially hardened solid steel cutting rollers

The induction-hardened solid steel cutting rollers are wear-resistant against cardboard staples and guarantee durability.

### Variable cushioning volume

Depending on the application, the cushioning volume of the packaging material can be adjusted as required.
